1. Zero Cost Marketplace 2.0

The Zero Cost Marketplace is a modern marketplace for products and services, with the exception of money. It is based on Blockchain technology and offers to solve one of the most urgent problems in today's world - high prices.

One of the first Zero Cost Marketplaces on the planet to provide free goods and services for people all over the world, including those who are living in poverty. A global, peer-to-peer marketplace for trade and services with a decentralized economy.

The Concept enables individuals from any country to buy or sell goods and services globally without any barriers of time, distance or language as well as eliminating the need for an intermediary such as eBay or Amazon.

We have seen this happen before when the internet started to develop and it became easier to communicate internationally and send messages instantly, even through email which had been invented earlier on but not really popularized yet at that point in time.

Sellers pay no commission fees and there are no listings prices, product listings will be free of charge for all users who want to sell their products on our platform

Our marketplace will be open to people from all over the world - we don't care about borders when it comes to commerce

The WEOWNS Project is a new global system of values, where everyone can get the opportunity to realize their idea. The Concept is a marketplace for the new economy, based on the blockchain technology that gives everyone an opportunity to become part of it.

We are creating our own new Zero Cost economy blockchain technology where your hard work and time are not exploited by others for their own profit, but shared with everyone in a way that creates a better world for all of us.

A zero cost economy where your hard work and time are not exploited by others for their own profit, but shared with everyone in a way that creates a better world for all of us.

The Concept promotes unity between all people on earth without any barriers through our decentralized platform which connects communities worldwide based on trust, equality and love among others values that are important for humanity's growth and development."

Imagine a world where all transaction costs are reduced or eliminated with secure transactions in real-time without borders or boundaries? We offer a fully functioning High Value Zero payment economy ecosystem for the secure Zero Cost Economy and coins that can be used by anyone across any border around the globe at no cost to you!

A revolution in payments where we can create local and regional currencies and promote trade, production, and consumption within communities on a global scale..

This means that all people will be able to live their lives without any monetary concerns as everything will be provided by the community at no cost!

With a competent development strategy and team of highly professional programmers who have helped to develop WeownomyChat, WEOWNS will have a fully complete blockchain that provides its customers with zero cost economy, enabling free trade or use coins in a wide zero cost ecosystem.

WEOWNS is decentralized, with no central authority that could interfere with transactions between users and traders of goods and services who are on different continents or countries.

There will be no fees whatsoever for trading, buying, selling goods and services on the platform.

WEOWNS is a decentralized, cost-free currency for an efficient world with no transaction fees and has fast transactions times of less than 5 seconds on average.

The issuing of WEOWNS is carried out collectively by the network, without any central authority; managing zero cost economy transactions and eliminating banks to create new opportunities in emerging markets..

It provides an open source platform with data transparency and full traceability on all steps of the supply chain process to ensure security and quality standards are met at every stage.

WEOWNS is open-source, its design is public, nobody owns or controls WEOWNS and everyone can take part in it. Thanks to many of its unique features, WEOWNS is able to provide such exceptional Zero Cost Economy that could not be previously provided by the existing decentralized payment systems.

We're developing a new type of cryptocurrency that is not based on blockchain mining like Bitcoin and Ethereum but on the value of its usability in an ecosystem with no fees for usage - there are no transaction fees, storage costs or miner rewards so it can be used globally by everyone without any need for special knowledge about cryptocurrencies.

The WEOWNS Protocol allows users to create their own economy within our system through free transactions (0% fees) on all services like sending messages, buying digital goods, etc.

It's a place where people can buy, sell, or trade goods and services without any middlemen taking a cut of the profits. Imagine how much more money you would have if you didn't have to pay Facebook, Google or other companies for their service!

Unlike traditional social media platforms such as Facebook, Instagram or Twitter which charge monthly fees, this is an ad-free and anonymous platform that has no costs associated with it whatsoever! Participate in Zero Cost Economy with anonymity and speed, all while saving money!

Using WEOWNS Card allows for free transactions between users of our cryptocurrency which means no fees on withdrawals or deposits to banks, exchanges or other crypto wallets.

WEOWNS cardholders can spend cryptocurrency at over 36 million locations worldwide by using an electronic chip that's connected to your smartphone or laptop via Bluetooth Low Energy (BLE). This allows you to bypass costly conversion rates while still having full control over your funds

Transaction fees are never charged to users, giving them access to financial services without spending their own money or paying out-of-pocket expenses.

The Concept is a first of its kind, an idea that will revolutionize the world economy by making it truly free to use all over the world with no cost at all!

The Concept's Zero Cost Economy technology means there are no transaction fees, which could revolutionize social media as we know it today, allowing users to profit from their content without ads or sponsored posts. With this cryptocurrency, you'll have the power to control your content, build your audience and finally get paid what you deserve!

WEOWNS is the world's first zero-fee proof of stake coin, built on the foundation of peer-to-peer transactions and decentralization for true financial freedom.

The Concept is a multifunctional coin that allows users to stake their coins in order to generate revenue from them, or use them as they please without having to pay any fees. This means that there are no central points of failure when it comes to using WEOWNS which makes it the perfect platform for building a truly decentralized economy with virtually unlimited transactions per second at minimal cost.

The mainnet will be built on top of all transactions being run through proof-of-stake protocols which are much more climate friendly than other mining algorithms because they don't require extensive computational power like Bitcoin does. This means that less energy is required for each transaction meaning better efficiency and sustainability while also helping prevent climate change."

With WEOWNS you can create your own masternode to receive staking rewards on our low-energy proof of stake blockchain, make instant zero payment transactions with others, or just accumulate for later use in a revolutionary new economy.

With blockchain powering our platform we can offer secure transactions without any fees or third party interference - all information will be made available in real time so that users know what they're getting before making their purchase decision (i.e., pricing info, product availability).

2. WEOWNS Overview

2.1 Our Mission

WEOWNS is building a global marketplace for goods and services, connecting sellers with buyers around the world. The current economic system has left billions of people with limited opportunities for growth and prosperity. WEOWN is a new type of global marketplace that empowers anyone to trade goods, services, skills or knowledge globally without borders.

All transactions are peer-to-peer and do not require any intermediaries like banks or credit card companies because all payments are made in our native cryptocurrency called WEONs (WEOWN's).

We believe that access should be free so everyone can connect to the world around them through trade.

WEOWNS is the world's first true decentralization project that will change how we think about our economy and society. With our platform, you can create a new economy for your business and bring in more revenue. Anyone can enter the crypto world at any time - without technical knowledge or skills required to understand blockchain technology.

The WEOWNS team are developing the next - - generation blockchain, which is the basis for the creation of a new Zero Cost economy payment network and transaction services. Our decentralized blockchain transaction network is open for everyone to use, and our token exchange enables the purchase of goods and services with WEOWNS tokens.

Blockchain creates a secure, transparent and unchangeable system of storing information which guarantees the safety of all transactions and data storage operations without any fees or commissions on transactions or information storage operations whatsoever.

A zero cost, fast and reliable global service that provides users with necessary tools for developing private economic relations. By means of

providing a decentralized network, in which all operations are processed without any additional intermediaries or regulators by smart contracts on the Zero Cost Marketplace blockchain.

You can also create a store to sell goods or offer services that would only be available to those who are connected to your private network through WEOWNS.

Whether you're an individual or a company, you can use our encryption services to safely communicate on your private channel with any person around the world without revealing your identity.

WEOWNS does not store any personal data of its users and guarantees 100% confidentiality in communications.

2.2 Our Goals.

WEOWNS will be the new generation of global marketplace that is not only free but also safe and independent from any governance or third party intermediaries.

With all the benefits mentioned above, you can start making money by selling goods on a global scale without paying anything in fees - this never existed before! You are in control of your funds at all times - no one can freeze them or make changes to them unless you agree to it!

Trade anonymously and securely from anywhere in the world at no cost - this creates opportunities for people who are not allowed to have bank accounts because they are undocumented immigrants or refugees.

This new blockchain-based economy will allow everyone from every corner of the world to have access to all necessary tools in order to prosper financially without any kind of intermediary or middleman entity which only benefits the elite minority at the expense of others, creating better living conditions for all humanity through decentralization and anonymity by means of its groundbreaking architecture called 'The Trustless System'.

We're taking a unique approach to digital assets by creating a new class called "**Zero Cost Payment Circulation**".

All transactions will be carried out in WEOWNS tokens, which would provide access to the system worldwide at no cost whatsoever and allow free conversion between different types of digital assets without restrictions imposed by the financial institutions that control them.

Transaction fees are eliminated and can be done with any type of digital asset or cryptocurrency, including fiat currencies like USD and EURO.

Imagine a system where transactions happen instantaneously with no charges on any side? We have it!

DLT is a powerful new technology that will make our blockchain network more secure than ever before while providing decentralization benefits to users all over the world.

WEOWNS coin - reliable tool for sustainable living. The company strives to create a common space where everyone who wants to share their knowledge has access to new technologies that allow you not only enjoy your favorite things but also get valuable rewards while doing it!

With an innovative economic model and a powerful technological infrastructure, we've created a revolutionary tokenized economy where people can trade goods and services without any middlemen, transaction fees or censorship

Weownomy's goal is not only to connect ecosystems but also drive commerce between them by facilitating cross-border trade without geographical limitations or currency exchange fees.

Our Goal is to reduce the cost of production while increasing quality by using our own blockchain to manage payments for all transactions between manufacturers, distributors, retailers and customers in order to provide transparency into the supply chain.

Unlike other networks, Weownomy's ZERO payment circulation network has no fees at all - even for transactions between users!

This platform consists of three components; (1) Owning/Exchanging (2) Trading goods and services; and (3) Providing investment opportunities in cryptocurrencies.

3. New Technologies of WEOWNS

3.1 Blockchain architecture

WEOWNS is the first blockchain with an innovative and revolutionary architecture that would allow fast zero transactions and communication, which has been designed to be used by anyone, anywhere in the world.

With our global network users can exchange digital assets from any country without intermediaries or borders to prevent frauds and scams

on both sides, creating a safe environment for everyone involved in the transaction process - sender and receiver alike.

Compared to Bitcoin, the WEOWNS Network has a significantly higher throughput capacity that can process millions of transactions per second on a sustainable Proof-of-Stake protocol.

You'll never have to pay for transactions on the WEOWNS blockchain because all transactions are verified through proof of stake validation - which means you only need to hold onto your coins to earn more coins!

The WEOWNS Proof of Stake algorithm underpins all transactions on the network with no extra energy consumption required, reducing your carbon footprint by up to 50%.

The WEOWNS blockchain has a low transaction cost that can process up to 1000 transactions per second.

Connecting communities around the globe to build a decentralized network for finance, health care and social welfare.

WEOWNS is a decentralized, public blockchain infrastructure that combines both the physical and virtual world's infrastructure to provide an advanced cross-chain solution for any industry.

We'll be developing and creating our own blockchain by combining both the physical and virtual worlds' infrastructures so we can solve any industry with our cross-chain solutions.

Our blockchain will be used by all people in the world, allowing everyone to use it with ease and without any boundaries.

Businesses can trade securely without the risk of fraud, tampering or interference from third parties with blockchain architecture because it is transparent and immutable by design.

Businesses can trade securely without the risk of fraud, tampering or interference from third parties with blockchain architecture because it is transparent and immutable by design.

With decentralized applications on the blockchain, individuals have more control over their data and who they share it with - making them safer from cybercrime while also providing true freedom in terms of mobility and location independence.

3.2 Masternodes

Blockchain architecture with Masternodes-nodes that not only store a copy of the entire blockchain and conduct zero cost transactions but also perform all the key Zero Cost Economy transactions to ensure the accurate operation of the network.

We are building a decentralized economy, where anyone can participate in any way they want without having to ask for permission from any central authority or pay high fees.

Our Proof of Stake (PoS) algorithm ensures the highest level of security while reducing the computational power needed to verify transactions. We've eliminated transaction fees in order to make it more affordable for all users. The most advanced and cost-effective network in the world.

We're designing a new global economy that's fast, fair and affordable for everyone - including you! All transactions on the WEOWNS blockchain are Zero Cost Economy transactions, meaning they're free of charge for all users no matter how big or small your business is!

We're Building a Secure, Decentralized Network. Masternodes operators are rewarded for keeping this Zero Cost payment network running. WEOWNS Coin uses the Proof of Stake (POS) mining algorithm to ensure that it has a sustainable and green method of generating coins without any high energy costs like Bitcoin or Ethereum require.

Also WEOWNS Masternodes perform such functions as:

- Supporting the Zero Cost Economy payment network,
- Generating blocks and confirming transactions,
- Increasing the level of transaction confidentiality,
- Increasing the speed of transactions (60 seconds),

- Serving as the basis for the distribution of income among the owners.

WEOWNS uses Proof-of-Stake (PoS) instead of Proof-of-Work (PoW), meaning our system is more efficient than Bitcoin or Ethereum's because we do not require computing power or specialized hardware to run a node on our network.

The goal is to create a platform that can be used globally with no fees attached whatsoever so people can send and receive funds without any additional costs associated with it.

Earn WEOWNS by maintaining the Blockchain, hosting a node or helping grow the community with various tasks that are vital to our success.

Setting up WEOWNS Masternodes is relatively simple even for novice users. Moreover, technical support for setting up WEOWNS Masternodes is always available.

In order to create WEOWNS Masternodes, you would not only need to meet the collateral requirements but also have:

A dedicated server A dedicated IP address A 24/7 online mode

In addition to the above-mentioned requirements, you would also need to monitor software updates that are regularly carried out by WEOWNS IT-specialists.

THE STEPS TO RUN THE NETWORK ARE AS FOLLOWS:

1. New transactions are broadcasted to all nodes
2. Each node collects new transactions into a block.
3. Each node works on finding a proof-of-stake for its block.
4. When the node finds a proof-of-stake, it broadcasts the block to all nodes.

5. Nodes accept the block only if all transactions in it are valid.
6. The acceptance of the block is done by working on creating the next block in the chain, using the hash of the accepted block as the previous hash.

Nodes always prefer a longer chain to be checked.

Hosting WEOWNS Masternodes requires a computer with Internet access and an operating balance of WEOWNS coins.

All these requirements ensure that WEOWNS Masternodes operators have a significant stake in the project, which significantly increases the overall security of the system.

3.3 WEOWNS Zero Cost Economy Payment network

With its global accessibility, users can send and receive payments from anywhere around the world without any restrictions or delays related to conversion rates or time zones.

There are no fees for transactions or withdrawals in WEOWNS because it is based on a decentralized architecture that does not require intermediaries to process the transactions.

Sending money with traditional cryptocurrencies can be expensive and time-consuming. With WEOWNS, you can send any amount anywhere in the world for free.

Our payment system has a very high transaction capacity - up to 100 000 transactions per second!

WEOWNS' application combines the convenience of cash with security from theft and fraud, reducing reliance on plastic cards while increasing access to funds for people who don't have bank accounts or credit cards

Paying people back has never been easier! Send money to someone's mobile phone in seconds - they don't even have to be online at that moment!

Transactions are completed instantly, without third party interference or waiting periods, all while maintaining your privacy.

It also becomes possible to make microtransaction, such as rewarding WeownomyChat social media app users for using it.

3.4 Digital Crypto Zero Cost Payment Card WEOWNS

The key tool for accessing the WEOWNS Zero Cost payment based blockchain solution is an innovative crypto card.

THIS CRYPTO CARD HAS FOUR MAIN FUNCTIONS:

1. WEOWNS Digital Crypto Zero Cost Payment Card is an ultra-secure cold crypto wallet designed to store digital assets and asset protection.

WEOWNS Digital Crypto Zero Cost Payment Card is equipped with a chip element that complies with CC EALS + banking security standards. One of the important advantages of the WEOWNS crypto card is its multi-currency feature.

WEOWNS uses the BIP39 key backup method, and also provides the ability to set an eight-digit PIN-code and a passphrase with subsequent binding to the backup PIN-codes.

2. Crypto card WEOWNS is also an analog of a savings account, providing the ability to place crypto deposits.

Thanks to the innovative WEOWNS technology, you can set up any conditions for accessing your assets and no one will be able to access your account until these conditions are met.

THE WEOWNS CRYPTO CARD ALLOWS TO:

- Store digital assets (cold wallet).
- Savings account.
- Paying to merchants in crypto.
- Use it as a 2FA safe key.

ADDITIONAL FEATURES

- Access conditions are entered into the WEOWNS blockchain as part of a block
- Any asset transfer is made based on specified conditions.

At the time of purchase, the cardholder transfers the data from the card through the gold merchant app. The request goes to the merchant system. After that, the cardholder can make a payment using cryptocurrency. The WEOWNS merchant system recognizes the wallet key and identifies it in the ecosystem, while simultaneously checking the balance of the card and performing the operation.

3. WEOWNS crypto card is a tool for accessing two-factor authentication across the entire ecosystem. The cardholder does not need to have a separate authentication key for each platform. When the card is opened, it generates a coin that changes every 60 seconds, which allows two-factor authentication for any WEOWNS service.

The service is available to the entire crypto community with the help of a fast and reliable API, which allows the cardholder to authenticate on an unlimited number of crypto platforms.

The WEOWNS Card package comes with a 1.23mm card and a regular charging device, ready to execute instant crypto payments.

Charging in less than 1 hour and with a stand-by lifetime battery of no less than 60 days, the waterproof WEOWNS Card has the

latest nanotechnology defined not only by its thickness-1.23mm, but also by the 1.3inch display, Apollo512 MCU, 15mAH battery, BLE 4.2, and secure NXP13B180 chip element.

The software behind the WEOWNS Card ensures the highest security of the wallet private keys, making the transfer of the assets impossible without the physical ownership of the card. Available for both iOS and Android, the app was created to manage and transfer assets without the risk of being hacked.

Ensuring an extensive ecosystem for the crypto community, the WEOWNS card will be among the first crypto cards in the world connected to a crypto merchant.

This provides the users the possibility to directly purchase Zero cost goods with a cryptocurrency like with any other regular card. WEOWNS card provides not only the advantages of a simple cold wallet, but is also a crypto savings cold wallet, a Zero cost payment crypto wallet, and finally, a security device for all your assets including the accounts in our ecosystem.

4 Coinomics of WEOWNS

4.1 The Zero Cost Economic Model of WEOWNS

WEOWNS is a collection of high-quality services that rely on their own blockchain, and actively form an elite community and a structured Zero Cost Economy ecosystem.

The WEOWNS Zero cost economic strategy is based on a transparent business model, which is focused on providing access to the blockchain network, ensuring safe, zero cost transactions and the sale of Zero cost products and services with a high-security level.

A distinctive feature of this project's economic strategy is a strong connection to the community, which is characterized by the ability to receive stable income through active participation in the project's infrastructure expansion.

This becomes possible due to the combination of two security levels, Proof-of-Stake (PoS) & Masternode.

WEOWNS is proud to be the developer and flagship of the revolutionary Zero Cost Economy technology, which successfully delivers personal annual income while implementing a deflationary coinomics model.

Since the Zero Cost fees, generated from all of the blockchain transactions, are burned, the new coins generated for stakers and masternode suppliers will be close to the spent quantity of coins from ecosystems users.

Also, since a high number of coins is consumed, with an increase in the number of zero cost transactions, the demand of WEOWNS might grow accordingly.

4.2 Factors of organic growth of the WEOWNS coin rate

4.2.1 Technology, Zero Cost Economy, and infrastructure support of the WEOWNS coin

WEOWNS is the backbone of a Zero Cost high-tech payment economy system. Merchants and online shops as well as service providers can be connected and accept payments with WEOWNS. You can buy zero cost goods and pay services with crypto currency, which has absolute liquidity in all Zero Cost Economy, infrastructure, and payment services of WEOWNS.

In case you ever decide that you no longer want to trade or acquire goods and services with WEOWNS, you can stake it and exchange the rewards for physical gold through our partners and pick it up almost anywhere around the globe, at any stage of the project.

4.2.2 An Exclusive Access Key

The payment of Zero Cost transactions and access to WEOWNS Zero Cost Economy services is carried out exclusively in coins, which are the key to access Mainnet. The growing demand for WEOWNS Coins, with an increase in the number of zero cost transactions and an increase in the popularity of the zero cost product and services offered, leads to an increase in the demand.

4.2.3 Zero Costs Transactions burning

The possible demand growth of the WEOWNS Coin is ensured by burning all WEOWNS Coins that the blockchain receives in the form of zero cost transaction cost. This allows tight control of the circulation supply and aims the demand increase.

4.3 WEOWNS Masternodes

WEOWNS provides minted rewards for the stakers and masternode holders. The staking and masternode rewards are paid in WEOWNS Coins that can be immediately converted into gold coin and then forwarded to physical gold.

In order to ensure the dynamic development of the WEOWNS blockchain-based zero cost payment system, it becomes necessary to create a maximum possible number of servers that would contain a full copy of the blockchain.

This contributes to maintaining high WEOWNS security and project decentralization.

In addition to directly contributing to the ecosystem and security of the coin, masternode operators will earn a 7.5% per annum revenue from the volume of collateral coins.

4.3.1 WEOWNS MASTERNODE PARAMETERS:

- Reward – 60% Per Year
- Collateral- 749.999 coins

The collateral is locked by the blockchain for 12 months, after which the assets must be transferred within 10 days, otherwise, the Masternode will be extended for another 12 months. The coins, generated from Masternodes, can be instantly exchanged for physical gold at our partners gold shop.

4.3.2 WEOWNS Staking

WEOWNS Staking is the process of storing WEOWNS Coins in a cryptocurrency wallet. During this period you receive a reward for the simple fact of holding coins Staking WEOWNS coins is the easiest and most affordable way to earn cryptocurrency.'

WEOWNS STAKING PARAMATERS:

- Reward- 60% per year
- Minimum – 249.999 coins

There is no maximum amount that can be deposited for staking. The more you deposit, the bigger reward you get. The coins, generated from staking, can be exchanged for gold coins and then to physical gold at our partners' gold shop.

4.4 WEOWNS Coin

A WEOWNS Coin is an internal unit of value that was created to allow users to interact with the internal blockchain and Zero Cost Economy.

The WEOWNS coin is also used as a means of distributing zero cost benefits among all interested parties.

With a limited initial supply of 21 billion coins, WEOWNS will obviously be a scarce resource. It can be spent as easily as fiat money.

WEOWNS coin is the ground brick of the internal Zero Cost Economy and serves as an access key to all global marketplace services and zero cost transactions carried out within WEOWNS blockchain. They also serve as the internal unit of Zero Cost payment and are thus used as a monetary value between ports.

These coins are liquid financial instrument that provides access to the powerful functionality of a high-tech blockchain network. Coins are a universal crypto currency that acts as a medium of exchange in the WEOWNS infrastructure. The WEOWNS coin can be freely exchanged by owners for fiat money, as well as other cryptocurrencies.

For this purpose, the coin has passed the listing procedure on LATOKEN Exchange and will also be on other crypto exchanges. Users can buy and sell WEOWNS Coins, with the value of the coin determined based on supply and demand in the open market.

In addition, from the very beginning, the reward received by users within the wallet of a Masternode and Proof-of-Stake (PoS) holder can be exchanged for a gold coin and then for physical gold in physical stores of WEOWNS Partners.

5. Advantages

There are a few objective factors that make WEOWNS the leader in the fast growing global blockchain technology market.

TO BE FULLY OPERATIONAL PRODUCT

The WEOWNS blockchain will be a fully operational in 2022 to allow users and businesses to connect to use Zero Cost Marketplace for Zero Cost products and services.

DIGITAL ZERO COST ECONOMY PAYMENT AND SOCIAL MEDIA USERS

Thanks to the unique blockchain architecture, the social media users will be paid for using Weownomy social media Platform and for Zero Cost Marketplace services.

MARKET SIZE

WEOWNS will operate in Zero Cost Economy and Social media platform market that a trillion dollar industry. The market for cryptocurrency payments is huge and the growth potential is unlimited.

WEOWNS MASTERNODES

The project allows the WEOWNS community to receive sustainable personal income by participating in the expansion of the Zero Cost payment network. In addition to

directly contributing to the ecosystem and the security of the coin, Masternodes operators receive generous rewards for keeping the WEOWNS blockchain secure.

THE CURRENT BUSINESS MODEL OF THE PROJECT

WEOWNS will be the first developer of a revolutionary technology that successfully generates Zero Cost Economy income through active participation in shaping the global infrastructure while simultaneously implementing a deflationary economics model.

This forms a transparent mechanism for the value growth of the WEOWNS Coin.

WEOWNS DIGITAL CRYPTO PAYMENT CARD

The WEOWNS Card will be released as the first crypto zero cost economy payment card connected to a crypto merchant. WEOWNS Card provides the advantages of a simple cold wallet, a crypto savings cold wallet, a Zero Cost Economy payment crypto wallet, and finally, a security device for all your assets including the accounts in our Zero Cost Economy ecosystem.
